

Ag-Jag Cluster Team (Team 7)

Team Profile

- What is the name of your team and why did you choose it?
 - Ag-Jag Cluster. Our team consists of members from two different institutions: Texas A&M University in College Station (TAMU), and Texas A&M University-San Antonio (TAMUSA). “Ag-Jag Cluster” came about because it references the TAMU Aggies, and the TAMUSA Jaguars. We felt this name represented both of our institutions equally.
- Why do you think your team will have an edge in the event (what's your secret sauce)?
 - It's a secret 🤫
 - Mad Linux Skills
 - Diversity of expertise
- What have you done to prepare that makes your team unique?
 - Working as a team from two separate Universities makes us unique. Pulling talented individuals from different communities makes us more diverse, and lets us bounce ideas off a wider array of viewpoints.
 - We have collaborated together since Day One and we thrive working together. We have regular general team meetings, and specialized Application meetings several times a week. Practice makes perfect and we are firm believers in that.
- What are you most looking forward to in the competition?
 - Compiling CESM2 on CentOS in the cloud and processing some massive data.
 - Meeting everyone from the other teams, even though we will do so virtually.
- What time zone is your team competing from?
 - US Central, Texas Time
- What do your team members do for fun?
 - Dylan - Bike rides! Bonus points for rides to spots with a nice view of the sunset. It became a thing in the summer, & now I'm just stuck with it.

- Petar - Going running. I love going for runs in nature. It calms my mind and it recharges energy levels, gives me a sense of calm - and the views are incredible.
 - Shaina - Photography. I love finding people and places to frame in a shot, and also exploring new locations and techniques. Freezing a moment gives me more time to appreciate it, however fleeting.
 - Selina - It's no wonder I am a water sign because I absolutely love the water and meditation! Just like my teammate and friend Jonathan, Swimming Swimming!!! I swam competitively from 5 years up until high school and every time I am in the water, I end up swimming the individual medley, I just can't help it. Spending a whole day at Spa Castle in Carrollton, Tx, meditating and relaxing in all the various sauna rooms is my idea of self-care fun!! Cooking for my family and friends because I am the hostess with the mostess :) Seriously what don't I do for fun? I love the outdoors if it is not cold, I'm up for any recreational activities.
 - Jonathan - Swimming. Swimming laps, diving, or lounging in the water, I love it all. Especially during the hot Texas summers.
-
- If your team had a theme song, what would it be?
 - Bob Marley - One Love

 - Can you share an interesting fact about your team?
 - We are "leet" and we got tricks in the form of netcat
